Post RN BSN Entry Test Preparation Book 2026

A full model paper in the real Post RN BSN pattern, with answer key

100 MCQs

Real Post RN BSN subject split

Answer key + online explanations

How to use this book

1. Sit each model paper in one go, in 120 minutes, with a pen and the answer sheet of your choice.
2. Mark yourself with the answer key at the back.
3. Every answer in the key is a link. Tap it to read why that option is right on TestUstad, free.

Want this paper timed and graded for you?

Practise every Post RN BSN subject free, chapter by chapter, at testustad.com/exams/post-rn-bsn-entry-test

What is in this book

100 MCQs across one paper, each drawn in the same subject split as the real Post RN BSN paper:

- Medical Surgical Nursing: 14 MCQs per paper
- Fundamentals of Nursing: 12 MCQs per paper
- Midwifery and Obstetric Nursing: 8 MCQs per paper
- Community Health Nursing: 8 MCQs per paper
- Paediatric Nursing: 6 MCQs per paper
- Mental Health Nursing: 4 MCQs per paper
- Nursing Management and Ethics: 4 MCQs per paper
- Nursing Pharmacology: 4 MCQs per paper
- English: 25 MCQs per paper
- Analytical and Logical Reasoning: 10 MCQs per paper
- General Knowledge: 5 MCQs per paper

MODEL PAPER 1 OF 1

Post RN BSN Entry Test

100 MCQs · 120 minutes · answer key at the back

Medical Surgical Nursing

14 MCQs

1. Which finding is expected when a Snellen chart is used to assess distance visual acuity?

- ☐ A The patient reads the smallest line from six metres
- ☐ B The patient identifies colours using a handheld card
- ☐ C The patient reads newsprint from a fixed distance
- ☐ D The patient follows a moving light with both eyes

2. A patient with cancer has a new colostomy after bowel surgery. Which finding requires the most urgent nursing assessment?

- ☐ A A moist pink stoma
- ☐ B Mild incisional discomfort
- ☐ C A dusky purple stoma
- ☐ D Small amounts of flatus

3. A patient with portal hypertension is scheduled for a rectal examination. Which nursing consideration is most important?

- ☐ A Clarify the procedure because trauma may cause bleeding
- ☐ B Proceed because rectal procedures reduce portal pressure
- ☐ C Give an intramuscular injection before examination
- ☐ D Ask the patient to strain during the examination

4. Which urinalysis finding most strongly supports an upper urinary tract infection involving the renal tubules?

- ☐ A White blood cell casts
- ☐ B Occasional squamous epithelial cells
- ☐ C Small numbers of mucus threads
- ☐ D A few calcium oxalate crystals

5. A patient with type 1 diabetes is taught to exercise safely. Which statement shows correct understanding?

- ☐ A I should exercise even when urine ketones are positive
- ☐ B I will carry a fast source of glucose during exercise
- ☐ C I can skip glucose monitoring on exercise days
- ☐ D I should inject insulin into the exercising muscle before activity

6. A patient receives spinal anaesthesia for lower-limb surgery. Which assessment is the priority during the immediate recovery period?

- ☐ A Check the return of motor and sensory function
- ☐ B Offer oral fluids to prevent a headache
- ☐ C Encourage walking as soon as sensation returns
- ☐ D Place the patient in a high-Fowler position routinely

7. Which position is most appropriate for a patient with ankylosing spondylitis who is resting in bed?

- ☐ A A prolonged flexed position with pillows under the knees
- ☐ B A prone position for periods as tolerated
- ☐ C A side-lying position with the spine sharply curved
- ☐ D A sitting position with the neck continuously flexed

8. A patient with suspected raised intracranial pressure becomes restless and reports worsening headache. Which nursing action best helps prevent further increases in intracranial pressure?

- ☐ A Keep the head midline and elevate the head of the bed
- ☐ B Place the patient flat and flex the neck forward
- ☐ C Encourage repeated coughing to clear secretions
- ☐ D Position the patient prone with the hips flexed

9. A patient with a suspected cervical spine fracture is being transferred from the accident scene. Which action is correct?

- ☐ A Maintain manual stabilisation and apply a cervical collar
- ☐ B Flex the neck slightly to improve venous drainage
- ☐ C Turn the head toward the painful side during transfer
- ☐ D Sit the patient upright before applying restraints

10. A patient develops severe dyspnea, chest pain and a falling oxygen saturation immediately after thoracentesis. Which action should the nurse take first?

- ☐ A Place the patient flat and leave the room
- ☐ B Stop observation until the procedure report is completed
- ☐ C Assess the patient, apply oxygen and notify the provider urgently
- ☐ D Encourage forceful coughing to remove pleural fluid

11. A patient with coronary artery disease is prescribed atorvastatin. Which laboratory test is most important for monitoring a possible serious adverse effect?

- ☐ A Serum alanine aminotransferase level
- ☐ B Serum potassium level
- ☐ C Activated partial thromboplastin time
- ☐ D White blood cell count

12. A patient with suspected pelvic trauma is pale, tachycardic and hypotensive after a road collision. There is no obvious external bleeding. Which intervention should the nurse anticipate while maintaining spinal precautions?

- ☐ A Encourage the patient to walk to assess leg movement
- ☐ B Apply a pelvic binder according to emergency protocol
- ☐ C Massage the abdomen to locate the bleeding site
- ☐ D Place the patient in a sitting position without support

13. A patient is prescribed timolol eye drops for open-angle glaucoma. Which history should the nurse report before giving the medication?

- ☐ A Seasonal allergic rhinitis
- ☐ B Chronic bronchial asthma
- ☐ C Controlled hypothyroidism
- ☐ D Previous cataract surgery

14. A patient receiving an immune checkpoint inhibitor develops a new persistent dry cough, chest tightness and low oxygen saturation. Which action should the nurse take?

- ☐ A Encourage deep breathing and continue the infusion
- ☐ B Report the findings promptly and withhold treatment until reviewed
- ☐ C Offer a high-fibre meal to relieve chest discomfort
- ☐ D Reassure the patient that this is expected hair loss

Fundamentals of Nursing

12 MCQs

15. Which intervention best reduces pressure injury risk for a patient who cannot move the heels independently?

- ☐ A Place a pillow under the calves to float the heels
- ☐ B Massage reddened skin over each heel every shift
- ☐ C Keep the heels directly against the mattress
- ☐ D Place a ring-shaped device beneath each heel

16. Which statement best describes standard precautions in nursing care?

- ☐ A They are used only for patients with a confirmed infection
- ☐ B They are used for every patient when contact with body fluids is possible
- ☐ C They require an N95 respirator for every patient encounter
- ☐ D They replace the need for additional isolation precautions

17. A patient with a fall risk has a goal to remain injury-free during the shift. Which finding best supports evaluation of this goal?

- ☐ A The patient says the ward feels comfortable
- ☐ B The patient remains free from falls and uses the call bell
- ☐ C The nurse explains the fall-prevention policy once
- ☐ D The patient receives the prescribed evening medication

18. A worker is found dizzy after inhaling fumes in a poorly ventilated room. Which action is safest for the first aider?

- ☐ A Enter quickly and carry the worker outside
- ☐ B Give the worker water before moving them
- ☐ C Move to fresh air only when the area is safe
- ☐ D Make the worker vomit to remove the fumes

19. A patient refuses a prescribed oral medication. Which documentation is most appropriate?

- ☐ A Medication given because it remains prescribed
- ☐ B Medication refused, reason given, and prescriber informed
- ☐ C Medication omitted without an entry to avoid blame
- ☐ D Medication held and recorded as a medication error

20. A patient receiving parenteral nutrition develops redness, tenderness and purulent drainage at the central-line insertion site. Which action should the nurse take first?

- ☐ A Increase the infusion rate
- ☐ B Assess the patient and notify the prescriber
- ☐ C Apply a warm compress and continue feeding
- ☐ D Flush the line with unsterile water

21. Which observation best indicates that oxygen therapy is improving a patient's oxygenation?

- ☐ A The patient becomes less restless and oxygen saturation rises
- ☐ B The patient reports increased thirst and a dry mouth
- ☐ C The patient develops redness behind both ears
- ☐ D The patient coughs once after the mask is applied

22. A patient has limited shoulder movement but can follow instructions and begins each movement independently. How should the nurse assist?

- ☐ A Support the limb while the patient completes the movement
- ☐ B Move the limb fully while the patient remains relaxed
- ☐ C Prevent movement until the joint becomes less painful
- ☐ D Apply strong resistance throughout the movement

23. A nurse is preparing a 24-hour urine collection. Which instruction is correct?

- ☐ A Save the first urine and end with the next morning urine
- ☐ B Discard the first urine and save every specimen afterward
- ☐ C Collect only the urine passed after meals
- ☐ D Stop collecting whenever the container becomes half full

24. Which adult oxygen saturation reading is generally expected when measured accurately on room air?

- ☐ A 82% to 86%
- ☐ B 88% to 92%
- ☐ C 95% to 100%
- ☐ D 101% to 105%

25. A patient has a shallow lower-leg ulcer with irregular edges, moderate oedema, and brown pigmentation around the ankle. Which problem most likely contributes to delayed healing?

- ☐ A Venous insufficiency
- ☐ B Arterial embolism
- ☐ C Acute lymphatic obstruction
- ☐ D Excessive arterial perfusion

26. A nurse is handling used linen from a patient with a draining wound. Which practice helps prevent the spread of microorganisms?

- ☐ A Shake the linen to remove visible particles
- ☐ B Hold the linen against the uniform while carrying it
- ☐ C Place the linen directly into the designated bag
- ☐ D Sort the linen on the floor before bagging it

Midwifery and Obstetric Nursing

8 MCQs

27. After the placenta is delivered, which assessment is most important before completing the procedure?

- ☐ A Checking that the placenta and membranes are complete
- ☐ B Measuring the mother's height and head circumference
- ☐ C Assessing the fetal lie inside the uterus
- ☐ D Determining the newborn's gestational age by weight

28. On the third day of life, a newborn develops swollen eyelids with thick purulent discharge from both eyes. Which action should the nurse take first?

- ☐ A Clean the eyes gently and arrange urgent medical treatment
- ☐ B Cover both eyes with a firm pressure dressing
- ☐ C Reassure the mother that this is normal tearing
- ☐ D Apply breast milk to the eyes and review tomorrow

29. Which cells in the seminiferous tubules provide nourishment and support to developing sperm cells?

- ☐ A Leydig cells
- ☐ B Sertoli cells
- ☐ C Prostatic cells
- ☐ D Bulbourethral cells

30. A pregnant woman is Rh negative and has no detectable anti-D antibodies. Which finding would suggest that fetal red cells have become affected by maternal antibodies?

- ☐ A Fetal hydrops with generalised oedema
- ☐ B Maternal ankle oedema after standing
- ☐ C Increased maternal appetite
- ☐ D Fetal breech presentation

31. A woman in late pregnancy suddenly becomes pulseless in the hospital. Which action should the emergency team take immediately?

- ☐ A Begin CPR with manual left uterine displacement
- ☐ B Wait for fetal monitoring before starting CPR
- ☐ C Place the woman in a fully supine position
- ☐ D Give oral fluids before assessing circulation

32. Which investigation is commonly offered during the first antenatal assessment to help detect infections that can affect the mother or fetus?

- ☐ A HIV and syphilis screening
- ☐ B Routine sputum culture
- ☐ C Daily stool examination
- ☐ D Chest radiography for every woman

33. A woman with endometriosis asks why she has severe menstrual pain and difficulty becoming pregnant. Which explanation is most accurate?

- ☐ A Endometrial-like tissue grows outside the uterus
- ☐ B The cervix remains permanently closed
- ☐ C The ovaries stop producing reproductive hormones
- ☐ D The vagina becomes infected after each period

34. A postnatal woman has a temperature of 38.5°C, pulse 112 beats per minute and feels faint. Her vaginal bleeding is not heavy. Which nursing action is the priority?

- ☐ A Offer a warm drink and allow her to rest
- ☐ B Assess her airway, breathing and circulation immediately
- ☐ C Encourage her to walk to improve uterine drainage
- ☐ D Teach routine perineal hygiene before further assessment

**Community Health Nursing**

8 MCQs

35. A patient with newly diagnosed type 2 diabetes is prescribed metformin. Which statement shows correct understanding of the medicine?

- ☐ A I should take it with meals to reduce stomach upset
- ☐ B I should stop it whenever my glucose reading is normal
- ☐ C I should take extra tablets after eating sugary food
- ☐ D I should expect it to cause severe low blood glucose alone

36. A nurse asks a client to explain the instructions in the client's own words after teaching. What is the main purpose of this action?

- ☐ A To check the client's understanding
- ☐ B To test the client's memory of terms
- ☐ C To measure the nurse's speaking speed
- ☐ D To identify the client's educational level

37. A city introduces legislation to reduce tobacco advertising before most young people begin smoking. Which level of prevention is illustrated?

- ☐ A Primordial prevention
- ☐ B Primary prevention
- ☐ C Secondary prevention
- ☐ D Tertiary prevention

38. A child with suspected measles is being assessed at a health facility. Which additional measure helps protect susceptible people who had close contact with the child?

- ☐ A Offer appropriate post-exposure vaccination when indicated
- ☐ B Give antibiotics to every household member
- ☐ C Restrict all visitors for one month
- ☐ D Provide iron tablets to every contact

39. Which example represents environmental sanitation rather than personal cleanliness?

- ☐ A Providing a community system for safe sewage disposal
- ☐ B Bathing daily and changing clothes regularly
- ☐ C Brushing the teeth after meals
- ☐ D Washing the hands before eating

40. A district health team plans a health campaign with the education, water and sanitation, and agriculture departments. What is the main benefit of this approach?

- ☐ A It limits health services to hospital treatment
- ☐ B It addresses health determinants through coordinated sectors
- ☐ C It removes the need for community health workers
- ☐ D It allows one department to control all local services

41. During a dengue outbreak, a nurse records the number of cases by village, age group and week of onset. What is the main epidemiological purpose of this information?

- ☐ A To describe disease distribution by person, place and time
- ☐ B To prove that one treatment caused recovery
- ☐ C To calculate the average height of the population
- ☐ D To replace laboratory confirmation of every case

42. A woman is assessed at home five days after delivery. Which finding should the community nurse report promptly?

- ☐ A Mild after-pains during breastfeeding
- ☐ B Small amounts of decreasing lochia
- ☐ C Temperature of 38°C with foul-smelling lochia
- ☐ D Mild tiredness after caring for the newborn

Paediatric Nursing

6 MCQs

43. A 4-year-old child is crying and moving during a routine set of vital signs. Which action improves the accuracy of the measurements?

- ☐ A Measure all vital signs while the child is crying
- ☐ B Allow the child to settle, then measure and record the findings
- ☐ C Ask the parent to hold the child firmly during measurement
- ☐ D Record the values as normal because crying affects all children

44. Which measure is most useful for preventing hookworm infection in children living in an endemic area?

- ☐ A Wearing shoes outdoors
- ☐ B Sharing towels only with siblings
- ☐ C Drinking milk before sleeping
- ☐ D Avoiding citrus fruits during summer

45. A child with suspected poisoning is awake, breathing normally, and has no specific antidote yet identified. Which action is safest while urgent toxicology advice is obtained?

- ☐ A Induce vomiting to remove the substance
- ☐ B Give milk to dilute every possible poison
- ☐ C Keep the container or substance information for identification
- ☐ D Give activated charcoal to every poisoned child immediately

46. Immediately after birth, which nursing action best prevents heat loss in a stable newborn?

- ☐ A Place the newborn under a fan for ventilation
- ☐ B Dry the newborn thoroughly and cover the head
- ☐ C Bathe the newborn in warm water
- ☐ D Leave the newborn uncovered for observation

47. Which situation is most likely to interfere with a young child's developmental progress?

- ☐ A Regular responsive interaction with caregivers
- ☐ B A balanced diet with adequate sleep
- ☐ C Persistent untreated hearing impairment
- ☐ D Opportunities for safe play and exploration

48. Which observation gives the most reliable estimate of a young child's usual portion size during a dietary assessment?

- ☐ A The caregiver's description of the child's favourite food
- ☐ B The measured amount served and the amount left over
- ☐ C The child's weight recorded at the last clinic visit
- ☐ D The number of meals listed on the clinic card

Mental Health Nursing

4 MCQs

49. Which finding in an older adult requires the nurse to assess for delirium promptly?

- ☐ A Gradual difficulty recalling recently learned information
- ☐ B Stable difficulty finding words over several years
- ☐ C Sudden change in attention and level of consciousness
- ☐ D Occasional need for extra time to remember a name

50. Which finding best describes tolerance to a substance?

- ☐ A The person needs more of the substance to obtain the same effect
- ☐ B The person develops symptoms after suddenly stopping the substance
- ☐ C The person continues use despite repeated social and health problems
- ☐ D The person experiences intoxication after taking a usual small amount

51. At the end of a counselling session, which nurse statement best uses summarising?

- ☐ A "You have talked enough about this problem for today."
- ☐ B "You need to decide what action you will take next."
- ☐ C "Today you described poor sleep, worry about work, and a plan to contact your sister."
- ☐ D "Do you feel better now that the session is finished?"

52. Which description best defines an auditory hallucination?

- ☐ A A false belief held despite evidence
- ☐ B A sensory perception without an external stimulus
- ☐ C A sudden loss of previously learned skills
- ☐ D A repeated movement without a clear purpose

**Nursing Management and Ethics**

4 MCQs

53. A researcher measures blood pressure with a device that consistently reads 10 mmHg higher than the true value for every participant. Which statement best describes this measurement?

- ☐ A It is reliable but lacks accuracy
- ☐ B It is valid but lacks consistency
- ☐ C It is both accurate and precise
- ☐ D It is neither systematic nor consistent

54. A nurse in charge reviews the ward's staffing plan for the next week. Which information is most useful for anticipating the required nursing workload?

- ☐ A The number of windows in the ward
- ☐ B The planned patient acuity and dependency
- ☐ C The age of the ward furniture
- ☐ D The distance from the nurses' station

55. Which action is most appropriate when completing an incident report for a patient-safety event?

- ☐ A Record objective facts, patient effects and actions taken
- ☐ B Include personal criticism of the staff member involved
- ☐ C Change the clinical record so it matches the incident form
- ☐ D Leave out near misses because no patient was harmed

56. During a clinical placement, an instructor asks a student to explain each decision while caring for a patient, then guides the student with questions. Which teaching strategy is being used?

- ☐ A Role play
- ☐ B Guided questioning
- ☐ C Programmed instruction
- ☐ D Independent reading

**Nursing Pharmacology**

4 MCQs

57. A patient taking a monoamine oxidase inhibitor asks which food should be avoided because it may cause a dangerous rise in blood pressure.

- ☐ A Fresh apples
- ☐ B Aged cheese
- ☐ C Boiled rice
- ☐ D Steamed carrots

58. A patient taking pyrazinamide for tuberculosis reports severe pain and swelling in the great toe. Which adverse effect should the nurse suspect?

- ☐ A Hyperuricaemia with gout-like pain
- ☐ B Severe hypoglycaemia from insulin release
- ☐ C Ototoxicity with vestibular damage
- ☐ D Aplastic anaemia from marrow failure

59. A patient receives insulin lispro before breakfast but then becomes unable to eat because of vomiting. Which action should the nurse take first?

- ☐ A Give the usual dose of NPH insulin
- ☐ B Check the blood glucose and notify the prescriber
- ☐ C Encourage the patient to walk before breakfast
- ☐ D Administer another dose of rapid-acting insulin

60. Which solution is compatible for priming blood transfusion tubing and flushing the line during a transfusion?

- ☐ A 5% dextrose in water
- ☐ B 0.9% sodium chloride
- ☐ C Ringer lactate
- ☐ D 5% human albumin

English

25 MCQs

61. Identify the incorrect part of the sentence. The child was fully dressed and sitting in her father's lap near the kitchen table.

- ☐ A Fully
- ☐ B Sitting in
- ☐ C Kitchen table
- ☐ D No error

62. Which one of the following sentence contains both a fact and an opinion?

- ☐ A Pakistan came into being in 1947 and the Quaid-e-Azam became the first governor general.
- ☐ B Mangoes are delicious, but apples are not.
- ☐ C The horse is an animal riding which is an exciting experience.
- ☐ D Islam is one of the Abrahamic religions and so is Christianity.

63. Select the correct sentence:

- ☐ A My feet seemed hardly to touch the earth.
- ☐ B My feet hardly seemed to touch the earth.
- ☐ C Hardly my feet seemed to touch the earth.
- ☐ D My feet seemed to touch the earth hardly.

64. Slipshod: organization (analogy):

- ☐ A Clever: shroud
- ☐ B Cringing: obsequious
- ☐ C Prodigal: generosity
- ☐ D Phlegmatic : emotion

65. If it did not rain in time, there _ a horrible famine.

- (A) would have been
- (B) will be
- (C) would be
- (D) will have been

66. Spot the error. "All is well what ends well", said the father when he had finished the story.

- (A) Is well what
- (B) Said the
- (C) When he had
- (D) The story

67. Choose the correct spelling:

- (A) Entripreneur
- (B) Entrepreneur
- (C) Entrepreneur
- (D) Entreprineur

68. 'ARABLE' means:

- (A) Not grown since long
- (B) Recently ploughed field
- (C) Watered the night before
- (D) Fit for cultivation

69. Which one of the following sentences "represents correct use of tense?

- (A) He told us that you have not fulfil your promise
- (B) He told us that we do not fulfilled our promise
- (C) He told us that we did not fulfill our promise
- (D) He told us that we did not fulfilled our promise

70. The story jumped off the page. Which poetic se device has been used in this line?

- (A) Metaphor
- (B) Paradox
- (C) Oxymoron
- (D) Personification

71. In each of the following question, four alternative sentences are given. Choose the CORRECT one and fill the Circle corresponding to that letter in the MCQ Responsen Form.

- (A) As she said the computer was programmed by Mona.
- (B) Just like she said the computer was programmed by Mona.
- (C) As like she said the computer was programmed by Mona.
- (D) Just like she had she said the computer was programmed by Mona.

72. Select the NEAREST CORRECT MEANING of the given word. HECTOR

- (A) Harass
- (B) Helpmate
- (C) Hellish
- (D) Hefty

73. A full description of car accidents _ reported.

- (A) are
- (B) have been
- (C) was
- (D) were

74. The Managing Director Staff to work had with a promise of high salary :

- (A) motivates
- (B) mitigates
- (C) maneuvers
- (D) minces

75. In the following question four alternative sentences are given. Choose the CORRECT option:

- (A) Christopher could not taste the drink until he had boiled it.
- (B) Until he had boiled It, Christopher could not taste the drink
- (C) Christopher could not taste the drink until he had not boiled it.
- (D) Christopher could not taste the drink till he had not boil it.

76. In each of the following question, four alternative meanings of a word are given. You have to select the nearest correct meaning of the given word and fill the appropriate. Felicity

- (A) Intense Happiness
- (B) Respite
- (C) Inspire
- (D) Sensational

77. Read the passage and answer the question given at the end. For my 25th birthday, my uncle gave me a gift and to go skydiving at a special place near Miami. I was happy because I wanted to do something wild. On the day of my jump, I could not take breakfast because of the nerves. Before I knew the danger involved in it, I was on the plane with a parachute on my back After the fall, I could feel adrenaline running through me. Then the parachute opened, and I was floating freely like a bird- Those wonderful moments helped me to realize that I am the kind of person who can take risks in life. The author learns from the experience of skydiving that:

- (A) Skydiving is dangerous
- (B) Miami is a good place for skydiving
- (C) He is capable of doing risky things in life
- (D) Skydiving made him so nervous that he could not take breakfast in the morning

78. Identify the errors and choose the correct option:

- (A) Guliver travels was written to Swift.
- (B) Guliver travels was written at Swift.
- (C) Guliver's Travels was written by Swift.
- (D) Gulivers' Travel was written by Swift.

79. Choose the word nearly opposite in meaning to the given word. ANXIETY

- (A) Problem
- (B) Worry
- (C) Relax
- (D) Nervous

80. The armies fought bravely, but neither could defeat the other. The sentence is:

- (A) Simple
- (B) Compound
- (C) Complex
- (D) Compound-Complex

81. Identify the MISTAKE in the following question: I remember going to the British museum one day to read for the treatment for some slight ailment of which I had a touch-hay fever, I fancy it was.

- (A) Going to (B) Read for
(C) Of which (D) I had

82. In each of the following question, four alternative sentences are given. Choose the CORRECT one and fill the Circle corresponding to that letter in the MCQ Response Form.

- (A) E-mail is a relatively new mean of communication.
(B) E-mail is a relatively new means of communication.
(C) E-mail is a relatively new mean to communication.
(D) E-mail is a relatively new means to communication.

83. A successful businessman is _ of the risks.

- (A) Audacious (B) Agoraphobic
(C) Dismay (D) Coerce

84. I eagerly look forward _ seeing you again.

- (A) At (B) To
(C) On (D) By

85. Identify the mistake that needs to be corrected. We wished today was sunny so that we could spend the day in the country communicating with nature.

- (A) Was (B) So that
(C) Could spend (D) In the country

Analytical and Logical Reasoning

10 MCQs

86. What number comes next in the following series? 34 24 16 10 6

- (A) 5 (B) 10
(C) 3 (D) 2
(E) 4

87. Asad bought 50 packets of biscuits for the price of Rs. 500, whereas Anum bought 25 packets of chips for the price of Rs. 1000. While comparing the prices of packets of biscuits and packet of chips, which of the following statements is correct?

- (A) Price of 4 packets of biscuits is equal to the price of 1 packet of chips
(B) Price of 1 packet of biscuits is equal to the price of 4 packets of chips
(C) Price of 2 packets of biscuits is equal to the price of 1 packet of chips
(D) Price of 1 packet of biscuits is equal to the price of 2 packets of chips

88. Methyl tetrachloride (MTC) is a chemical found in some pesticides, glues, and sealants. Exposure to MTC can cause people to develop asthma. In order to halve the nation's asthma rate, the government plans to ban all products containing MTC. The government's plan to halve the nation's asthma rate relies on which of the following assumptions?

- ☐ A Exposure to MTC is responsible for no less than half of the nation's asthma cases.
- ☐ B Products containing MTC are not necessary to the prosperity of the country's economy.
- ☐ C Asthma has reached epidemic proportions.
- ☐ D MTC products are helpful for asthma.

89. Read the following statement, assuming everything in it to be true. Then decide which of the given suggested courses of action logically follow and are worth pursuing. Statement: "Aalia wants to sleep but cannot due to regular noise in and around her house everyday." Courses of Action: I. Insert good quality noise blockers into her ears. II, Take strong sleeping pills."

- ☐ A I
- ☐ B II
- ☐ C Both I and II
- ☐ D Neither I nor II

90. Statement: All scientists are fair. All fair people are strong. Conclusions: (I) All scientists are strong. (II) Some strong people are fair.

- ☐ A Only conclusion I is correct
- ☐ B Only conclusion II is correct
- ☐ C Either conclusion I or II is correct
- ☐ D Both conclusion I and II correct

91. Read the following and choose the correct answer : " P, Q and R are one-digit, non-negative numbers. P is the smallest even number. Q is the largest odd number. R is 5."

- ☐ A $P+Q+R=16$
- ☐ B $P+Q+R=12$
- ☐ C $(Q+R) \times P=30$
- ☐ D $(Q+R) \times P=8$

92. In the following question, a statement is given followed by four inferences. You have to decide which of the given Inferences can definitely be drawn from the given statement. Indicate your answer. Statement: Most dresses in that shop are expensive. Inferences: I. Some dresses in that shop are expensive. II. There are cheap dresses also in that shop. III. Handloom dresses in that shop are cheap. IV. There are no cheap dresses available in that shop.

- ☐ A Only I follows
- ☐ B Only II follows
- ☐ C Only III follows
- ☐ D Only IV follows
- ☐ E None follows

93. Statements: I. The Importance of yoga and exercise is being realized by all sections of the societyII. There is an increasing awareness about health in the society particularly among middle ages group of people.

- ☐ A Statement I is the cause and statement II is its effect.
- ☐ B Statement II is the cause and statement I is its effect.
- ☐ C Both the statements I and II are independent causes.
- ☐ D Both the statements I and II are effects of independent causes.

94. UDOMETER is coded as DUMOTERE then how will SUBLEASE be coded?

- ☐ A USBAELES
- ☐ B USLBESAE
- ☐ C USLBAEES
- ☐ D USLBEAES

95. P and Q are M's parents. M and N are siblings. Q is N's mother. What is P to M?

- ☐ A Mother
- ☐ B Father
- ☐ C Sister
- ☐ D Brother

General Knowledge

5 MCQs

96. CBA stands for _____?

- ☐ A Collective Bargaining Agent
- ☐ B Collective Bargaining Agency
- ☐ C Collective Bargaining Administration
- ☐ D Collective Bargaining Association

97. The largest famine hit Ethiopia in _____?

- ☐ A 1980
- ☐ B 1983
- ☐ C 1990
- ☐ D 1993

98. what is the power capacity of Diemer Bhasha Dam?

- ☐ A 5400 MW
- ☐ B 5000 MW
- ☐ C 4000 MW.
- ☐ D 4500 MW
